1. login.html

```
<html>
<body>
<form action="LoginServlet" method="post">
Username:
<input type="text" name="uname"><br><br>
Password:
<input type="password" name="pass"><br><br>
<input type="submit" value="Login">
</form>
</body>
</html>
```

2. LoginServlet.java

```
import java.io.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
@WebServlet("/LoginServlet")
public class LoginServlet extends HttpServlet {
    protected void doPost(HttpServletRequest req,
        HttpServletResponse res)
        throws IOException {
        PrintWriter out = res.getWriter();
        String u = req.getParameter("uname");
        String p = req.getParameter("pass");
        if(u.equals("admin") && p.equals("123")) {
            HttpSession s = req.getSession();
            s.setAttribute("user", u);
            out.println("<a href='home'>Home</a><br>");
            out.println("<a href='profile'>Profile</a><br>");
            out.println("<a href='logout'>Logout</a>");
        } else {
            out.println("Invalid Login");
        }
    }
}
```

3. Home.java

```
import java.io.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
```

```
@WebServlet("/home")
public class Home extends HttpServlet {
    protected void doGet(HttpServletRequest req,
        HttpServletResponse res)
        throws IOException {
        PrintWriter out = res.getWriter();
        HttpSession s = req.getSession(false);
        if(s != null)
            out.println("Welcome Home");
        else
            out.println("Login First");
    }
}
```

4. Profile.java

```
import java.io.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
@WebServlet("/profile")
public class Profile extends HttpServlet {
    protected void doGet(HttpServletRequest req,
        HttpServletResponse res)
        throws IOException {
        PrintWriter out = res.getWriter();
        HttpSession s = req.getSession(false);
        if(s != null)
            out.println("Profile Page");
        else
            out.println("Login First");
    }
}
```

5. Logout.java

```
import java.io.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
@WebServlet("/logout")
public class Logout extends HttpServlet {
    protected void doGet(HttpServletRequest req,
        HttpServletResponse res)
        throws IOException {
        HttpSession s = req.getSession(false);
        if(s != null)
            s.invalidate();
    }
}
```

```
        res.getWriter().println("Logged Out");  
    }  
}
```
