Procedure from client side

```
<!DOCTYPE html>

<html>

<head>

    <title>Login Form</title>

</head>

<body>

    <form action="LoginServlet" method="post">

        Username:

        <input type="text" name="uname"><br><br>

        Password:

        <input type="password" name="pass"><br><br>

        <input type="submit" value="Submit">

    </form>

</body>

</html>
```

Servlet code:

```
import java.io.IOException;

import java.io.PrintWriter

import javax.servlet.ServletException;

import javax.servlet.annotation.WebServlet;

import javax.servlet.http.HttpServlet;

import javax.servlet.http.HttpServletRequest;

import javax.servlet.http.HttpServletResponse;

@WebServlet("/LoginServlet")

public class LoginServlet extends HttpServlet {

    protected void doPost(HttpServletRequest request,

        HttpServletResponse response)

        throws ServletException, IOException {

        response.setContentType("text/html");
```

```
    PrintWriter out = response.getWriter();  
    String username = request.getParameter("uname");  
    String password = request.getParameter("pass");  
    out.println("<html><body>");  
    out.println("<h2>Login Details</h2>");  
    out.println("Username: " + username + "<br>");  
    out.println("Password: " + password)  
    out.println("</body></html>");  
}  
}
```
